## Definitions

*Company* – Catella AB (publ).

*Consolidated situation* – The Consolidated situation within the Group in which Catella AB (publ) is the parent company.

*Group* – The group in which Catella AB (publ) is the parent company.

*Group Risk Control* – The risk control function at Catella AB which has the overall responsibility to coordinate risk management within the Consolidated situation.

*ICLAAP* – Internal Capital and Liquidity Adequacy Assessment Process

*IRRBB* – Interest Rate Risk in the Banking Book.

*Licensed Companies* – The companies within the Group which conduct operations subject to a licensing obligation and which thus are under the supervision of the SFSA or an equivalent foreign regulatory authority.

*LCR* – Liquidity Coverage Ratio.

*LR* – Leverage Ratio.

*Management Body* – The Board of Directors at the Company and/or the Licensed Companies.

*SFSA* – The Swedish Financial Supervisory Authority.

## 1. Introduction

This document discloses information related to risk, risk management and capital adequacy for the Consolidated situation in accordance with part eight of the Capital Requirements Regulation (EU) 575/2013. This disclosure is also referred to as Pillar III, distinctive from the other two pillars of the above regulatory framework, encompassing generic requirements for minimum regulatory capital (Pillar I), and requirements for institution specific risk and capital adequacy assessments (Pillar II).

On behalf of its status as reporting institute for the Consolidated situation the disclosure report is published by Catella Bank S.A. Additional information is provided in the Company's annual report and quarterly interim reports.

Information in this document is based on the situation as per year-end 2017. The document shall be read in conjunction with the interim financial reports and presentations, as well as press releases published on the website of Catella published after that date ([catella.com](http://catella.com)).

A separate disclosure document for the Bank is published by Catella Bank.

## 2. Organisation and governance

Subject to above regulation, addressed to credit institutions and investment firms, Catella A.B, due to its ownership of Catella Bank S.A. and due to the materiality of other financial activities deployed within the Catella Group, is classified as a financial holding company. Consequently, subsidiaries of Catella A.B. that deploy activities as specified in above regulation are part of the Consolidated situation and hence also subject to prudential regulatory oversight by the Luxembourg Financial Supervisory Authority CSSF.

Independent from this prudential consolidated supervision, some subsidiaries are subject to individual requirements and under supervision of a regulatory authority (Licensed Companies).

The table below provides a list of the Licensed Companies included in the Consolidated situation as per 31 December, 2017.

	Corp. id nr.	Domicile	Ownership share %
Catella AB (publ)	556079-1419	Stockholm	
Catella Bank SA	B 29962	Luxemburg	100
Catella Fondförvaltning AB	556533-6210	Stockholm	100
IPM Informed Portfolio Management AB	556561-6041	Stockholm	51
IPM Informed Portfolio Management UK Ltd	10365981	London	51
Catella Real Estate AG	HRB 169051	München	95
Catella Kapital & Pension AB	556886-9019	Stockholm	100
Catella Asset Management AS	917 354 049	Oslo	51
Elementum Asset Management AS	912 800 423	Oslo	51
Ambolt Advisors S.á.r.l	156 205	Luxemburg	51
European Equity Tranche Income Ltd	44552	Guernsey	100
Catella Holding AB	556064-2018	Stockholm	100
Catella Brand AB	556690-0188	Stockholm	100
Catella Property Fund Management AB	556660-8369	Stockholm	100

For more information on the organisational and legal structure of the Consolidated situation, see Annex 1.

Description of the entities included in the Consolidated situation.

#### Catella AB

Catella AB is a parent financial holding company in the Group. Group management and other central group functions are integrated in Catella AB.

#### Catella Bank

Catella Bank provides cards and payment solutions for clients in Europe. Catella Bank operates as a card issuing and card acquiring bank within the framework of proprietary Visa and MasterCard licenses. Card operations are conducted from Luxembourg.

In parallel, Catella Bank is offering lending services to Wealth Management clients and provides tailored wealth management and asset management services. It also offers specialist investments in properties and unlisted companies. Wealth Management operations are conducted from offices in Stockholm, Gothenburg, Malmö and Luxembourg. Catella Bank is a credit institution regulated by CSSF in Luxembourg. The bank has 179 employees.

Additional information with regards to Catella Bank is provided in Catella Bank Risk & Capital Management report.

#### Catella Fondförvaltning

Catella Fondförvaltning offers actively managed equity, hedge and fixed-income funds. Catella Fondförvaltning currently manages 12 funds with various management styles and risk profiles.

Geographical focus and expertise is concentrated in the Nordic countries. The company has 32 employees in Stockholm.

The company is authorised by the SFSA to fund activities under the Mutual Funds Act (LVF), the law of the managers of alternative investment funds (LAIF) and also permission for discretionary portfolio management regarding financial instruments.

#### IPM Informed Portfolio Management

IPM is a provider of systematic investment services in discretionary management and fund management. IPM currently has assets under management of SEK 77 Bn on assignment from major institutional investors, pension funds, insurance companies and foundations. IPM has 57 employees in Stockholm.

IPM is authorised by the SFSA as an Alternative Investment Fund Manager (AIFM), with ancillary licenses to perform discretionary portfolio management and investment advisory services, within the meaning of the Alternative Investment Fund Managers Directive 2011/61/EU and the related Swedish Alternative Investment Fund Managers Act. Furthermore IPM is also registered with US Securities and Exchange Commission (SEC) as an Investment Adviser Firm and with the US Commodity Futures Trading Commission (CFTC) as a Commodity Pool Operator and Commodity Trading Advisor.

IPM Informed Portfolio Management UK Ltd, is a wholly-owned subsidiary of IPM that was established in 2017. As of FYE 2017, the company had one employee providing marketing and distribution services to IPM. The company itself is not regulated, but its activities are overseen and regulated through an Appointed Representative agreement with Sapia Partners, LLP.

#### Catella Real Estate

Catella Real Estate provides real estate fund management, portfolio and asset management advisory services for real estate funds and real estate investment advice. Catella Real Estate is based in Munich. The company's purpose is to design, develop and manage fund products that are geared towards the Group's expertise and market position. Catella Real Estate's funds are mainly designed for institutional investors and are characterized in each case by a clear profile and a focus on specific risk classes and regions. The company currently distributes seven open-ended public real estate fund and ten real estate special funds, in all cases under German investment law. Furthermore, Catella Real estate provides advisory services regarding the portfolio and asset management of real estate institutional funds for an external management company Catella Real Estate has 60 employees in Munich.

Catella Real Estate is regulated by BaFin in Germany.

#### Catella Kapital & Pension

Catella Kapital & Pension conducts insurance mediation. The company is authorised by the SFSA to carry out insurance brokerage of insurance in all classes of life insurance and accident insurance and health insurance. Catella Kapital & Pension has two employees in Stockholm.

#### Elementum Asset Management AS

Non-regulated company. Elementum Asset Management (Elementum) is an independent adviser and asset manager focusing on the development, processing and management of real estate investment in the Nordic commercial property market. The company performs advisory and management assignments for real estate environments. The company has four employees in Oslo.

#### Ambolt Advisors S.à.r.l

Non-regulated company. The main object of the company is to render advisory, management, accounting and administrative services to Ambolt S.A.SICAV-SIF, a Luxembourg specialised investment fund under the provisions of the Luxembourg law of 13 February 2007 relating to specialised investment funds. The company has one employee in Luxembourg.

#### European Equity Tranche Income (EETI)

The company's principal activity is to hold a portfolio of securitized European loans with primary exposure in housing. The investment objective is to hold the portfolio until maturity making opportune disposals. EETI is based in Guernsey and has no employees.

#### Other companies

Other companies within the Consolidated situation, Catella Holding AB, Catella Brand AB, Catella Property Fund Management AB, and Catella Asset Management AS are holding companies whose business is to own and manage shares in subsidiaries. Former subsidiary Catella Trust GmbH was sold in November 2017.

## 2.1. Corporate governance

Responsibility for the management and control of operations in the entities within the Consolidated situation is divided between the shareholders at the Annual General Meeting, the Management Body, the Chief Executive Officer and the auditor elected by the Annual General Meeting. This responsibility is based on the Companies Act, the Articles of Association, Nasdaq Stockholm listing agreement and internal rules of procedure and instructions. These provisions are applied and followed up with the aid of company-wide reporting procedures and standards. Further information regarding corporate governance is provided in the Company's annual report 2017.

## 2.2. Accounting principles & treatment

Consolidated accounts for the Consolidated situation have been prepared in accordance with the Group's accounting policies and the Annual Accounts for Credit Institutions and Securities Companies Act. All units included in the Consolidated situation are fully consolidated.

## 3. Risk management objectives and policies

### 3.1. Strategies and Processes

This section describes the overall strategies and processes which governs the risk management within the Consolidated situation.

The primary objective of risk management within the Consolidated situation is to ensure that material risks are identified, reported, managed and monitored in relation to each Licensed Company and the Consolidated situation as a whole. The overall framework for risk management within the Consolidated situation is established through the minimum requirements presented in the Guidelines for Group Risk Control. Within the framework established in the minimum requirements, each Licensed Company has the mandate to adopt stricter requirements for risk management.

In order to identify and manage all material risks, within the Consolidated situation as well as the Licensed Companies, self-assessments are continuously being carried out. Such self-assessments are among other things performed as forward looking workshops as well as through the analysis of business critical processes. Each Licensed Company as well as the Company also performs a self-assessment within the scope of the annual ICLAAP process.

All risks identified within the scope of self-assessments are further analyzed in order to determine whether or not the risk exceeds the risk limits established in accordance with the Consolidated situation's overall risk appetite.

Risks are managed in accordance with the following strategies, in adherence with the appetite and limits defined by Catella:

- Transferring the risk to another party
- Avoiding the risk

- Reducing the negative effect of the risk
- Accepting some or all of the consequences of a particular risk and report this to the Board of Directors

### 3.2. Structure and organisation of the risk management function

The Management Body at the Company has the strategic responsibility to supervise the Consolidated situation's risk exposure and to determine the overall principles for managing material risks. The Management Body also determines the overall risk appetite for the Consolidated situation and actively participates in the development of internal rules for risk management. The risk appetite and internal rules are reviewed by the Management Body on an annual basis.

Each licensed company within the Consolidated situation has an established function for risk control which is independent from the daily business operations. It's the responsibility of the risk control function to monitor and manage all risks which materialise within the scope of the Licensed Company's business operations. The risk control function reports to the Management Body and CEO of the Licensed Company, as well as to the Group Risk Control function within the Company. The risk control function is set up in proportion to the scope and complexity of the business carried out within each Licensed Company.

The Group Risk Control is responsible for coordinating the risk management efforts carried out within the Consolidated situation and to monitor the risk exposure of the Consolidated situation as a whole. In order to monitor the risk exposure of the Consolidated situation the Group Risk Control receives continuous reports from the risk control functions within the Licensed Companies. The Group Risk Control function compiles the data gathered through such reports and presents an overview of the Consolidated situation's risk exposure to the Management Body at the Company on a quarterly basis.

### 3.3. The scope and nature of risk reporting and measurement systems

The risk control function of each Licensed Company is responsible for reporting the risk exposure to the CEO and Management Body as well as to the Group Risk Control. The Group Risk Control then has the responsibility to compile and report the risk exposure of the whole Consolidated situation to the Management Body at the Company.

All identified risks are measured and compared to the risk limits and risk appetite established within each Licensed Company. The risk appetite and risk limits of the Licensed Companies are developed within the scope of the overall group risk appetite which has been established by the Management Body at the Company.

### 3.4. Policies for hedging and mitigating risk

The business carried out within the Consolidated situation is exposed to financial as well as operational risk. Financial risks within the Consolidated situation include among others credit -, market-, and liquidity risks. The methods used to mitigate the above mentioned risks are summarized below.

### **Credit Risk**

Credit risk is the risk of financial loss from an obligor's failure to meet the terms of any contract with the Consolidated situation or otherwise fail to perform as agreed. The credit risk within the Consolidated situation relates mainly to retail, corporate and institutional exposures.

Credit risk within the Consolidated situation is monitored both by the business area itself, the CFO as well as by Group Risk Control. Frequently, a detailed assessment is made of the Consolidated situation's exposures and reported to the Management Body. The CFO of the Company manages counterparty risk.

### **Market Risk**

Market risk is the risk of loss or reducing future income due to fluctuations in interest rates, exchange rates and share prices, including price risk relating to the sale of assets or closure of positions.

#### Market price risk

All trading in financial instruments in the Consolidated situation is client based and not conducted for proprietary trading or speculative purposes, which is why the market price risk is regarded as limited. Catella Bank is indirectly exposed to market price risk on the value of security submitted for client loans and other commitments.

#### Interest rate risk

Interest rate risk is the risk that the Group's net profit could be impacted by changes in general interest rate levels. The Company has mainly raised loan financing in SEK at variable interest for its own operational financing. Interest rate risk is a particular focus within Catella Bank. However, the Bank's interest rate risk exposure is limited because there are usually matching fixed income investments subject to similar terms as interest commitments, alternatively with an interest margin favoring Catella Bank. Catella Bank continuously analyses and monitors its exposure to interest rate risk.

#### Exchange rate risk

The Group is active internationally and is subject to exchange rate risks (FX risk) that arise from various currency exposures. Exchange rate risk is comprised of *transaction* risk that arises through business transactions and recognized assets and liabilities, as well as *translation* risk that arises through net investments in foreign operations.

Subsidiaries' operations are predominantly conducted in the country in which they are located, and accordingly, transactions are executed in the same currency as the subsidiary's reporting currency. Accordingly, transaction exposure is limited.

Catella Bank conducts card operations, in which holders of debit and credit cards execute transactions in different currencies that are settled in the Bank's clearing system. This settlement is daily in foreign currencies. To reduce currency risk in currencies other than Catella Bank's functional currency (EUR) the accumulated positions are sold daily.

The majority of the revenues of the subsidiary IPM are denominated in foreign currency, mainly USD and EUR, while the majority of expenses are in SEK. Currency risk arises when invoices in foreign

currency are raised against clients. Because their maturity is short, the risk of substantial fluctuations in exchange rates is low. In order to reduce currency risks positions in foreign currencies are sold continuously. In addition, IPM utilizes currency forward contracts to further limit its currency exposure.

Other companies within the Consolidated situation had on the reporting date no substantial liabilities or assets in foreign currencies that resulted in net exposure in a currency other than the companies' functional currencies.

The accounts of the Company and the Consolidated situation are denominated in SEK while Catella Bank, Catella Real Estate, Ambolt and EETI have their net assets denominated in EUR. This means that, from the Consolidated situation's perspective, Catella has equity in foreign currencies that is exposed to exchange rate fluctuations. This exposure leads to a translation risk and thereby to a situation in which unfavourable exchange rate fluctuations could negatively impact the Consolidated situation's foreign net assets upon translation to SEK.

Market risk within the Consolidated situation is monitored both by the business area itself as well by the Group Risk Control. FX-risk inherent in the balance sheet is monitored and managed by the CFO of the Company. Among other things, various stress tests are used in order to determine what capital buffer is needed to cover this risk. Group Risk Control reports the exposure towards FX-risk to the Management Body on a regular basis.

Additional information with regards to Catella Bank is provided in Catella Bank Risk & Capital Management report.

### **Operational Risk**

Operational risk is the risk of financial loss resulting from inadequate or failed internal processes, people and systems or from external events. It is inherent in every business organisation and covers a wide spectrum of issues.

The operational risk in the Consolidated situation has been estimated to be moderate. The Consolidated situation is mainly exposed to operational risk connected to IT-disruptions, manual processes, regulatory reporting and compliance and legal risks

The operational risks are mitigated through good internal governance. The enforcement of good internal governance is an on-going process that includes:

- Reporting/Evaluation of incidents
- Self-assessment
- Monitoring of Key Risk Indicators (KRI)
- Continuous training of employees regarding the content of the internal policies and guidelines and the internal information and reporting systems.

### 3.5. Declaration on the adequacy of risk management arrangements

In accordance with Article 435 (e) of CRR, the Management Body of the Company declares that the risk management systems put in place within the Consolidated situation are satisfactory with regards to the profile and strategy of the Consolidated situation.

### 3.6. Risk Statement

The overall risk appetite of Catella at Group level has been expressed as medium. When the Consolidated situation provides financial products and services, risk shall be estimated and compared to expected revenue to the extent it is economically justifiable. The risks taken shall be limited, and no speculative elements shall occur in the daily operations. The Consolidated situation shall ensure to maintain the amount of internal capital that the Management Body considers adequate to cover all the risks which the Consolidated situation is exposed to.

The optimal capital level is dependent upon balancing the following:

- To operate above minimum regulatory capital levels, taking into consideration the Consolidated situation's risk profile and the regulatory requirements; and
- To generate an attractive return on equity, and keeping the equity in the business at an efficient level.

To meet the regulatory requirements, the Consolidated situation's capitalization shall be risk-based, founded on an assessment of all risks inherent in the operations and forward looking, aligned with strategic and business planning.

The Consolidated situation has established a risk appetite framework, approved by the Management Body and reviewed on an annual basis. The table below provides the thresholds which have been determined for the Consolidated situation as part of the risk appetite framework. The Consolidated situation as well as each individual entity is required to maintain a capital ratio of one percent above the local regulatory requirements as well as a LCR which exceeds regulatory requirements by 10%.

Indicator	Threshold (% of the total risk exposure amount)
Capital ratio requirement (Pillar I, Pillar II, internal buffer and capital conservation buffer) (% of the total risk exposure amount)	> 15,7 %
Largest exposure to non-institution (exposure to one client or a group of connected clients)	< 20 %
Largest exposure to institution (exposure to one client or a group of connected clients)	< 90 %
Liquidity Coverage Ratio	> 70 %
Internal Liquidity Ratio	> 80 %
Interest rate risk sensitivity	< 10 % of capital base
Leverage ratio (external requirement from 1 January 2019)	> 3 %

For non-financial risks, Catella applies the following target limits for the Consolidated situation:

Indicator	Target Limit
Minimum testing frequency of each Business Continuity Plan	Once a year
Maximum Initiation frequency of each Disaster Recovery Plan (DRP)	Once every 2 years
Maximum number of Information Security incidents	Number and materiality of incidents implying internal and/or external data leakage shall not increase relatively over time
Maximum time to decide on the risk strategy for newly identified high and medium information security risks (i.e. risk avoidance, risk acceptance, risk mitigation, or risk transfer)	1 week
Information Security information and training coverage	100 % of new staff within 6 months
	100 % of all staff to be informed annually

#### Vulnerability management:

Severity	CVSS Rating	System Classification	
		Critical Systems	Other Systems
High	7-10	No high vulnerabilities older than 1 month without documented action plan	Number of high vulnerabilities without documented action plan: zero
Medium	4-6.9	No medium vulnerabilities older than 1 month without documented action plan	Number of medium vulnerabilities without documented action plan older than 3 months: zero
Low	0-3.9	No low vulnerabilities older than 3 months without documented action plan	

Adherence of the actual risk profile of the Consolidated situation with above thresholds is monitored through internal reporting, as well as through the quarterly processes for regulatory capital and financial reporting (COREP, FINREP, LCR).

#### 4. Governance Arrangements

This section describes the governance arrangements currently existing within the Consolidated situation. The Management Body of the Company has the ultimate responsibility for the Consolidated situation's governance arrangements and all information, regarding the Management Body provided in this section, therefore relates to the Company.

#### 4.1. Experience, knowledge and directorships held by members of the management body

The table below provides a summary of information regarding each member of the Management Body in the Company. More detailed information is provided in the Company's annual report.

Member of the board	Directorships	Experience	Education
Johan Claesson	Claesson & Anderzén AB Apodemus AB Bellvi Förvaltnings AB Fastighetsaktiebolaget Bremia Alufab PLC Ltd K3Business Technology Group plc Leeds Group plc Nighthawk Energy plc	Owner and chairman of the board in Claesson & Anderzén AB	Degree of Master of Science in Business and Economics
Johan Damne	Several directorships within the Claesson Anderzén Group Parnas park Holding AB Fanfar AB Gastn 2 AB	CEO Claesson & Anderzén AB	Degree of Master of Science in Business and Economics
Joachim Gahm	Arise AB Sustainable Growth Capital SGC AB Kungsleden AB S&A Sverige AB	CEO at Öhman Investment AB	Degree of Master of Science in Business and Economics
Anna Ramel	Erik Penser Bank AB (publ) Nordea Asset Management AB Nordea Investment Management AB	Compliance consultant within the financial sector. Legal Counsel at ABG Sundal Collier AB and Alfred Berg Fondkommission AB.	LL.M.
Jan Roxendal	Exportkreditnämnden Magnolia Bostad AB AP2 Fund	CEO at Gambro AB CEO and Group president at Intrum Justitia Group Deputy CEO ABB Group Group president ABB Financial Services.	Degree in Bank Management

## 4.2. Policy of diversity for selection of members to the management body

Catella AB applies the Swedish code for corporate governance which among other things define rules regarding the size and composition of the company's Management Body. The Consolidated situation also strives to ensure that the Management Body of each Licensed Company has a well-diversified constitution in terms of both knowledge and experience.

## 4.3. Risk committee

The Consolidated situation has not set up a separate risk committee. Matters relating to risk management are discussed at audit committee meetings with representatives from the Management Body together with the Group Risk Control.

## 4.4. Information flow on risk to the management body

The audit committee of the Company receives, at least quarterly, reports from the Group Risk Control regarding the risk exposure of the Consolidated situation as a whole. Reports are based on among other things risk limits, Key Risk Indicators as well as thresholds relating to regulatory capital and liquidity requirements.

## 5. Own Funds

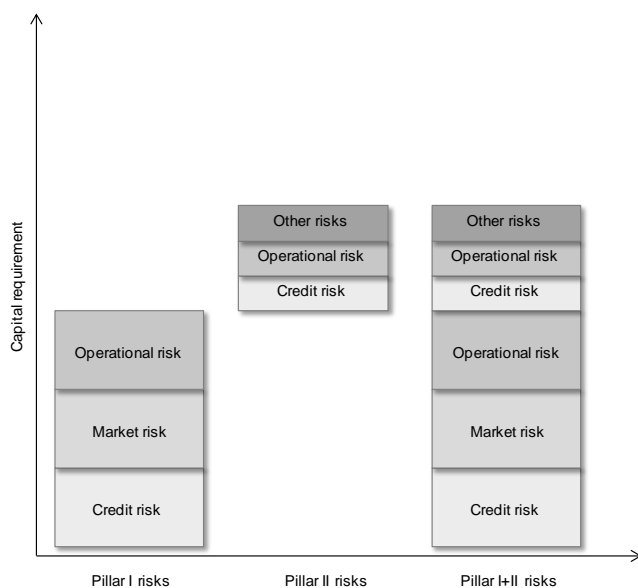

Information regarding own funds of the Consolidated situation is disclosed according to the format described in the delegated regulation (EU) 1423/2013. Information regarding own fund is included in annex 2 and 3 of this report.

## 6. Capital Requirements

### 6.1. Assessment of internal capital

In order to assess its capacity to support all the risks it is exposed to when conducting its business, the Consolidated situation has set up an ICLAAP methodology in accordance with article 73 of Directive 2013/36/EU. The ICLAAP approach used is Pillar I [plus]. In this approach, "the internal capital requirements for Pillar I risks are considered to be equal to the prudential own funds requirements. The risks which are not covered or not fully captured by the minimum prudential own funds requirements are subject to a separate assessment". When resulting exposure is considered material and capital is seen as an adequate risk mitigant, capital needs are added to the risks of the first pillar in order to define the overall internal capital requirement. The figure below illustrates the Pillar I [plus] approach.

Through the ICLAAP process, the Consolidated situation's management has conducted a risk identification process with the support of a group of selected members representing different areas of knowledge of the Consolidated situation's business. With regard to their function, those members provide the appropriate level of oversight to the project given their day-to-day responsibilities and remit for the ICLAAP project.

Within the ICLAAP process individual risks should be quantified where possible. This means that a method for the quantification should be presented as well as the result of applying this model to the risk at hand. The sophistication of the models used will vary with the size and complexity of the risks involved.

The models used by the Consolidated situation range from simple impact/probability models to more advanced numerical methods, depending on the risks being considered. The reasons behind each specific choice of model as well as possible alternatives (where appropriate) are discussed for each risk individually.

The type of capital used to cover the Pillar II capital requirements is solely core equity tier one (CET1) capital.

## 6.2. Key parameters and assumptions

When conducting the ICLAAP, the following parameters and assumptions have been used:

**Risk Appetite:** The Consolidated situation shall comply with the limits of the risk appetite framework. In particular, the Consolidated situation shall maintain a risk profile with resilience to both short term and long term external stresses in order to report, in normal conditions, a total CET1 capital ratio above 15.7 % of the total risk exposure amount.

**Correlation:** As explained in previous sections, the Consolidated situation uses a ‘building block’ approach that adds up the capital needs arising from the assessments of single risks in its business. By implicitly assuming a full positive correlation between risks, the Consolidated situation has opted for a conservative approach that does not take into account diversification across risk types. This approach is very conservative and overestimates the actual risk exposure. At the same time it provides the Consolidated situation with a buffer to absorb model errors or other small deficiencies in its ICLAAP.

### 6.3. Risk-weighted exposure amounts

#### Own funds requirements

Specification of risk-weighted exposure amounts and own funds requirement Pillar I.

Specification of risk-weighted exposure amounts and own funds requirements Pillar I, SEK M	2017 31 Dec		2016 31 Dec	
	Risk-weighted exp.amount	Own funds requirements Pillar I	Risk-weighted exp.amount	Own funds requirements Pillar I
<b>Credit risk according to Standardised Approach</b>				
Exposures to institutions	584	47	451	36
Exposures to corporates	850	68	480	38
Exposures to retail	3	0	123	10
Exposures secured by mortgages on immovable property	244	20	286	23
Exposures in default	295	24	277	22
Items associated with particular high risk	169	13	134	11
Exposures in the form of covered bonds	3	0	3	0
Exposures to collective investment undertakings (funds)	15	1	16	1
Equity exposures	340	27	129	10
Other items	741	59	548	44
	3.242	259	2.446	196
<b>Market risk</b>				
Interest risk	0	0	0	0
Foreign exchange risk	893	71	795	64
	893	71	795	64
<b>Operational risk according to the Basic Indicator Approach</b>	1.570	126	1.199	96
<b>Credit valuation adjustment risk</b>	3	0	0	0
<b>Total</b>	<b>5.708</b>	<b>457</b>	<b>4.440</b>	<b>355</b>

### 7. Asset Encumbrance

Information regarding the asset encumbrance of the Consolidated situation is disclosed according to the format described in the EBA Guidelines (EBA/GL/2014/03). Information regarding asset encumbrance is included in annex 4 of this report.

### 8. Credit risk adjustments

Information regarding the credit risk adjustments of the Consolidated situation is disclosed according to the format described in the EBA Guidelines (EBA/GL/2014/03). Information regarding credit risk adjustments is included in annex 5 of this report.

### 9. Leverage Ratio

Information regarding the leverage ratio of the Consolidated situation is disclosed according to the format described in the Commission implementing regulation (EU) 2016/200. The company has a leverage ratio of 19% (14%), compared to the suggested limit of 3% proposed by the EBA. No further

processes are being used to manage the risk of excessive leverage. Information regarding the leverage ratio is included in annex 6 of this report.

## 10. Liquidity Coverage Ratio

Information regarding the liquidity coverage ratio of the Consolidated situation is disclosed according to the format described in the EBA Guidelines (EBA/GL/2017/01). The company has a liquidity coverage ratio of 129.81% (131.98%), compared to the regulatory limit of 80%. Information regarding the liquidity coverage ratio is included in annex 7 of this report.

## 11. Countercyclical Capital Buffer

Information regarding the countercyclical capital buffer of the Consolidated situation is disclosed according to the format described in the Commission delegated regulation (EU) 2015/1555. The company has an institution specific countercyclical buffer rate of 1.01% (0.37%). Information regarding the countercyclical capital buffer is included in annex 8 of this report.

## 12. Use of ECAIs

The Consolidated situation uses Standard & Poor's (S&P) as the nominated External Credit Assessment Institution (ECAI) for associating the external rating of the asset with the credit quality steps in CRR for all exposure classes.

If the asset does not have an external rating, the external rating of the issuer is used.

## 13. Exposures in equities not included in the trading book

Exposures in equities not included in the trading book consist of shares in subsidiaries active in advisory services to the property sector, property asset management and certain other operations. These subsidiaries are part of the Group but they are not part of the Consolidated situation. The subsidiaries are held for strategic and profit-related reasons. Exposures in equities also include Catella Bank's holding of class C preference shares in Visa Inc. which were received in connection with Visa Inc.'s acquisition of Visa Europe in June 2016 and a minor holding of listed shares.

From the perspective of the Consolidated situation shares in subsidiaries have been measured at cost or fair value at the balance sheet date, whichever is lower, and decline in value is considered to be permanent.

As per 31 December, 2017 the carrying value of shares in subsidiaries amounted to 260 mSEK (75). Fair value is estimated to be a significantly higher amount. Furthermore, results from participations in subsidiaries amounted to 375 mSEK (18) which has been recognized in the income statement of the Consolidated situation in 2017. Results from participations in subsidiaries consists of dividend income of 172 mSEK, reversal of previous write-down of shares of 200 mSEK and a capital gain from sales of Catella Trust GmbH of 4 mSEK.

In 2017 Property Asset Management was established in the Netherlands and Sweden. Furthermore in November 2017, following approval by the Luxembourg supervisory authority (CSSF), Catella

acquired 60% of the shares in Catella Asia Ltd, for the distribution of products and services destined for the Chinese and other Asian markets. Further during the year, Catella acquired additional shares in an unlisted holding in a Swedish limited company. The book value of the holding, also market value, was 14 mSEK as of 31 December 2017.

#### 14.Exposure to interest rate risk on positions not included in the trading book

Interest rate risk relates to a firm's sensitivity to changes in the levels of interest rates and the structure of the yield curve. Interest rate risk is generated by all agreements that are expected to generate future cash flows because movements in interest rates changes the present value of these cash flows and in some instances the size of these cash flows. The cash flows must not be certain however they should be (reasonably) expected in some future instances. Interest rate risk is therefore a structural risk that naturally derives from the taking of deposits, granting loans and making deposits that is at the basis of banking activity.

As of 2016 Catella Bank is calculating this situation for the Bank and for the Catella Group on the consolidated situation. Group interest rate risk has been identified in two entities included in the consolidated situation, mainly connected to Catella Bank but also for the SEK 500 Mio bond issued by Catella AB. The EETI loan portfolios are in an IRRB sense considered equal to an equity ownership and are thus not sensitive to interest rate risk. Additional information with regards to Catella Bank is provided in Catella Bank Risk & Capital Management report.

The Bank and the consolidated situation has identified the following positions not included in the trading book to be subject to interest risk:

Assets
Cash and cash balances with credit institutions and central banks
Debt instruments
Loans and advances
Liabilities
Deposits from credit institutions
Deposits other than from credit institutions
Debt certificates (including bonds)

IRRBB capital requirements are measured with the EVE-method, and the net interest income is measured on the NII situation:

- 1) EVE measures the effect that differences in re-pricing dates and maturities between the firm's assets and liabilities have on the firm's economic value in different interest rate scenarios.
- 2) NII estimates the impact of interest rate changes on the Profit and Loss statement over the period of assessment chosen of five years, thus the model covers one year in addition to the banks budgeting horizon.

IRRBB is assessed based on a number of different yield curve stress scenarios. As of June 2018, the scenarios considered are:

<i>Scenario</i>	<i>Short description</i>	<i>High level details</i>
<i>Scenario01</i>	CSSF parallel up	All interest rate +200bp
<i>Scenario02</i>	CSSF parallel down	All interest rate -200bp
<i>Scenario03</i>	Steepening	Shortest rates down 20bp and longest rates up 150bp
<i>Scenario04</i>	Flattening	Shortest rates up 125bp and longest rates down 50bp
<i>Scenario05</i>	Short rates up	Rates below 3 year up by 20bp
<i>Scenario06</i>	Short rates down	Rates below 3 year down by 20bp
<i>Scenario07</i>	EUR up / SEK down	EUR rates up by 75bp and SEK down by 25bp
<i>Scenario08</i>	EUR down / SEK up	EUR rates down by 25bp and SEK up by 75bp
<i>Scenario09</i>	Liquidity crisis	Credit base rates are increased by 40bp. All other rates are maintained.

Scenarios are expected to be added or amended over time as is the selection of scenarios to be reviewed. EVE results of Scenario 01 and 02 are the regulatory shocks and are reported to the Luxembourg regulator, CSSF.

The measurement of interest rate risk is carried out on a quarterly basis for the scenarios in question, and the Bank's ALCO is responsible to review results and, given the evolution of the economic context, may decide if any other scenarios should be analysed.

## 15.Exposure to securitisation positions

As per end of 2017 no securitisation positions were held within the Consolidated situation<sup>1</sup>.

## 16.Credit risk mitigation techniques

In the Consolidated situation, credit risk mitigation techniques are only used for exposures generated by the balance sheet and off-balance sheet items of Catella Bank. Information with regards to Catella Bank is provided in Catella Bank Risk & Capital Management report.

## 17.Remuneration policy

The Consolidated situation has set up a remuneration committee with representatives from the Management Body of the Company and which is responsible for evaluating the remuneration policy's effect on the overall risk management within the Consolidated situation. The policy for the remuneration schemes throughout the Consolidated situation will be based on the following Principles:

---

<sup>1</sup> The EETI loan portfolios are classified as exposures in default when calculating own funds requirements in accordance with Regulation (EU) No 575/2013.

Catella AB will ensure throughout the Consolidated situation that:

Robust governance arrangements are upheld, which include

- a clear organisational structure with transparent and consistent lines of responsibility,
- effective, proportionate and comprehensive processes to identify, manage, monitor and report the risk that Catella AB or parts of the Group is or might be exposed to, and adequate internal control mechanisms, including sound administration and accounting procedures;
- Sound and effective risk management practices are implemented that do not encourage risk taking that exceeds the combined risk appetite and tolerated risk of the Group;
- Business strategy, objectives, values and long-term interests of the Group are clearly defined and are ultimately in line with the shareholders' expectations;
- Conflicts of interest are avoided or effectively mitigated, as necessary;
- Staff engaged in control functions are independent from business units of the entity that they oversee, and that appropriate authority and remuneration is linked to their functions, independent of the performance of the business areas they oversee;
- Appropriate and holistic ratios are set between fixed and variable remuneration for Identified Staff, which shall include the possibility to pay no variable remuneration component;
- Variable remuneration is decreased or withheld for personnel that fails to comply with all relevant internal rules and regulations applicable to their work position.
- Variable remuneration should normally not exceed 100 % of the fixed remuneration for any employee. On an exceptional basis, and in accordance with the procedure set out in Appendix 2, variable remuneration may be set to a maximum of 200 %, provided shareholders' meeting approval from the Bank is obtained.
- The remuneration systems and practices of the Group are important factors in ensuring that the Group can achieve its strategic objectives whilst maintaining adherence to the Principles. They are intended to ensure a remuneration level that will enable all entities within the Group to attract and retain sufficient numbers of qualified personnel in a dynamic market environment. The remuneration models and parameters are geared to the long-term business success. The system may include the following elements:
  - Discretionary fringe benefits aimed at creating a working environment that encourages performance, offers recognition to employees and supports them beyond the immediate workplace;
  - Company pension schemes tailored to the relevant conditions in the countries in which the Group is present. Should discretionary company pension schemes be offered all relevant regulatory requirements applicable to such a scheme must be observed, including any requirements for minimum withholding periods in line with the regulatory requirements in the Consolidated situation;
  - The remuneration composition for employees should strike an appropriate balance of variable and fixed remuneration;
  - In connection with remuneration issues, the Group does not tolerate any form of discrimination with regard to gender, ethnic background, sexual orientation, age, religion or disabilities;

- Variable remunerations shall always be paid after consideration is given to of the performance of the employee (which should include components for risk-adjustment), the business unit concerned, and of the overall results of the Group company in which the employee is employed;
- Except for “sign-on” bonuses paid in exceptional circumstances in order to hire personnel that would otherwise be difficult to attract and only for their first year of employment, no bonuses may be promised, or awarded if not justified by appropriate performance or achievements, and no variable remuneration should be awarded to members of management of Group companies unless justified;
- Performance or achievements shall always be evaluated taking into account their long-term benefits or impact on the Group company of employment. The assessment of an employee or a department’s performance will take into account long term strategic views and goals of the Group Company’s long-term strategic plan;
- The total variable remuneration pool of a Licensed Company or of Catella AB may never limit the ability of the Licensed Company to strengthen its capital base or of Catella AB to maintain an appropriate level of solidity;
- Any severance package or remuneration package relating to compensation or buy out from contracts in previous employment for companies included in the Consolidated situation should only be contemplated by the company of employment if it aligns with the long term strategy and interests of the company in question. This includes any retention, deferral, performance and clawback arrangements;
- All Group companies should establish a suitable performance review and variable disbursement procedure;
- Clawback arrangements should apply to all Risk Takers in the Consolidated situation, to the extent it is legally valid under local law;
- Staff is required to undertake not to use personal hedging strategies or remuneration- and liability- related insurance to undermine the risk alignment effects embedded in their remuneration arrangements;
- No variable remuneration shall be paid through vehicles or methods that facilitate the non-compliance with the CRR or CRD IV.
- The application and implementation of the above Principles should be supervised by the Group control functions on overall Group level and by the local control functions of the Licensed Companies. The control functions will also retain the obligation of constructing, designing and operating the remuneration practices encapsulated in this Policy.

Group Management may decide that certain of the listed principles above should be applicable to companies within the group outside the Consolidated situation.

### 17.1. Quantitative information

The tables below provide quantitative information regarding remunerations for the Consolidated situation. As the Consolidated situation is not organized into separate business areas the information required by CRR article 450 1. (g) is presented in relation to each relevant Licensed Company. All figures are presented in kSEK.

**Aggregate quantitative information on remuneration broken down by Licensed Company.<sup>2</sup>**

Company	Total remuneration	
	2017	2016
Catella AB	12.317	10.817
Catella Bank S.A.	61.403	42.395
Catella Fondförvaltning AB	64.429	37.035
Informed Portfolio Management AB	57.432	57.117
Catella Real Estate AG	22.434	23.202
Catella Trust GmbH	0	2.879
	<u>218.016</u>	<u>173.446</u>

**Aggregate quantitative information presented according to CRR article 450 1 (h) i – vi.<sup>3</sup>**

	Senior management		Other employees whose work duties have a material impact on undertaking's risk profile	
	2017	2016	2017	2016
Fixed remuneration	55.161	55.109	69.145	54.709
Variable remuneration	33.609	32.521	60.099	31.108
Number of beneficiaries	26	28	61	50

Net values of on-balance-sheet and off-balance-sheet exposures (corresponding to the accounting values reported in financial statements but according to the scope of regulatory consolidation as per Part One, Title II, Chapter 2 of the CRR). The counterparty sector allocation is based exclusively on the nature of the immediate counterparty. The classification of the exposures incurred jointly by more than one obligor should be done on the basis of the characteristics of the obligor that was the more relevant, or determinant, for the institution to grant the exposure.

	Net value of exposures at the end of the period		
	Financial sector entity	Non-financial sector entity	Total
Central governments or central banks		478 478	478 478

Gross carrying values (corresponding to the accounting values before impairment, provisions and accumulated negative fair value adjustments due to credit risk reported in financial statements but according to the scope of regulatory consolidation as per Part One, Title II, Chapter 2 of the CRR). When the amount of accumulated impairment and provisions and negative fair value adjustments due to credit risk is materially different from the amount of specific and general credit risk adjustments disclosed in Templates EU CRR1-A to D, institutions should separately disclose the amount of accumulated negative changes in fair value due to credit risk.

	Gross carrying values of performing and non-performing exposures						Accumulated impairment and provisions and negative fair value adjustments due to credit risk				Collaterals and financial guarantees received	
	Of which performing but past due > 30 days and <= 90 days	Of which performing forborne	Of which non-performing			On performing exposures		On non-performing exposures		On non-performing exposures	Of which forborne exposures	
			Of which defaulted	Of which impaired	Of which forborne	Of which forborne	Of which forborne					
Debt securities	306 645											
Loans and advances	4 255 877		274 817	274 817				12 260				
Off-balance-sheet exposures	2 681 400											

Accumulated amounts of specific and general credit risk adjustments for impaired and defaulted loans and debt securities (general credit risk adjustments may be related to non-defaulted or non-impaired loans and debt securities).

	Accumulated specific credit risk adjustment	Accumulated general credit risk adjustment
<b>Opening balance</b>	15 794	
Increases due to amounts set aside for estimated loan losses during the period	408	
Decreases due to amounts reversed for estimated loan losses during the period	3 942	
Decreases due to amounts taken against accumulated credit risk adjustments		
Transfers between credit risk adjustments		
Impact of exchange rate differences		
Business combinations, including acquisitions and disposals of subsidiaries		
Other adjustments		
<b>Closing balance</b>	12 260	
Recoveries on credit risk adjustments recorded directly to the statement of profit or loss	514	
Specific credit risk adjustments directly recorded to the statement of profit or loss	408	

## Gross carrying values

	Gross carrying value defaulted exposures
<b>Opening balance</b>	267 746
Loans and debt securities that have defaulted or impaired since the last reporting period	7 072
Returned to non-defaulted status	
Amounts written off	
Other changes	
<b>Closing balance</b>	274 817

## Annex 6 – Leverage Ratio

Reference date	31 /12/2017
Entity name	Catella AB
Level of application	Consolidated

Table LRSum: Summary reconciliation of accounting assets and leverage ratio exposures

	Applicable Amounts in kSEK
1 Total assets as per published financial statements	6 395 766
2 Adjustment for entities which are consolidated for accounting purposes but are outside the scope of regulatory consolidation	-211 231
3 Adjustment for fiduciary assets recognised on the balance sheet pursuant to the applicable framework but excluded from the leverage ratio exposure measure according to Article 429(11) of Regulation (EU) NO. 575/2013	
4 Adjustments for derivative financial instruments	4 248
5 Adjustments for securities financing transactions	
6 Adjustment for off-balance sheet items (ie conversion to credit equivalent amounts of off-balance sheet exposures)	436 255
7 Other adjustments	-691 072
8 Leverage ratio exposure	5 933 966

<b>Capital and Total Exposures</b>	
20 Tier 1 capital	1 110 599
EU-21a Exposures of financial sector entities according to Article 429(4) 2nd subparagraph of Regulation (EU) NO. 575/2013	
21 Total Exposures (sum of lines 3, 11, 16, 19 and 21a)	5 933 966
<b>Leverage Ratios</b>	
22 End of quarter leverage ratio	0,19
EU-22a Leverage ratio (avg of the monthly leverage ratios over the quarter)	
<b>Choice on transitional arrangements and amount of derecognised fiduciary items</b>	
23 Choice on transitional arrangements for the definition of the capital measure	
24 Amount of derecognised fiduciary items in accordance	

<b>Table LRSpl: Split-up of on balance sheet exposures (excluding derivatives and SFTs)</b>		<b>CRR leverage ratio exposures</b>
EU-1	Total on-balance sheet exposures (excluding derivatives and SFTs), of which:	<b>5 927 731</b>
EU-2	Trading book exposures	
EU-3	Banking book exposures, of which:	5 927 731
EU-4	Covered bonds	28 219
EU-5	Exposures treated as sovereigns	478 266
EU-6	Exposures to regional governments, MDB, international organisations and PSE NOT treated as sovereigns	
EU-7	Institutions	2 404 678
EU-8	Secured by mortgages of immovable properties	458 085
EU-9	Retail exposures	3 593
EU-10	Corporate	680 810
EU-11	Exposures in default	280 145
EU-12	Other exposures (eg equity, securitisations, and other non-credit obligation assets)	1 593 935

## Annex 7 – Liquidity Coverage Ratio

Scope of consolidation: Consolidated		Total weighted value			
Currency and units: kSEK					
Quarter ending on (DD Month YY)		31 March 17	30 June 17	30 September 17	31 December 17
Number of data points used in the calculation of averages		7	10	12	12
21	LIQUIDITY BUFFER	415 454	426 967	443 252	468 301
22	TOTAL NET CASH OUTFLOWS	309 985	315 598	329 259	344 481
23	LIQUIDITY COVERAGE RATIO (%)	134,02%	135,29%	134,62%	135,94%

The table is in line with EBA's Guidelines on LCR disclosure and the values represent 12 months averages for each reported quarter-ending.

## Annex 8 – Countercyclical capital buffer

## Geographical distribution of relevant credit exposures

kSEK	General credit exposure		Trading book exposure		Securitisation		Own funds requirements				Own funds requirement weights	Countercyclical capital buffer rate	
	Exposure value for SA	Exposure value for IRB	Sum of long and short position of trading book	Value of trading book exposure for internal models	Exposure value for SA	Exposure value for IRB	Of which: General credit exposures	Of which: Trading book exposures	Of which: Securitisation exposures	Total
